

Human INHBB ELISA Kit

Description	The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of ACVB in human serum, plasma and other biological fluids
Model	STJ150451
Applications	ELISA
Gene ID	3625
Gene Symbol	INHBB
Dilution range	15.625--1000pg/mL
Tissue Specificity	Serum, Plasma, Biological Fluids
Note	For Research Use Only (RUO).
Protein Name	Inhibin beta B chainActivin beta-B chain
Molecular Weight	45.1 kDa
Conjugation	Unconjugated
Concentration	1000pg/mL
Storage Instruction	Store at 4°C for 6 months.
Database Links	HGNC:6067OMIM:147390Reactome:R-HSA-1502540
Alternative Names	Inhibin beta B chainActivin beta-B chain
Function	Inhibins and activins inhibit and activate, respectively, the secretion of follitropin by the pituitary gland, Inhibins/activins are involved in regulating a number of diverse functions such as hypothalamic and pituitary hormone

secretion, gonadal hormone secretion, germ cell development and maturation, erythroid differentiation, insulin secretion, nerve cell survival, embryonic axial development or bone growth, depending on their subunit composition, Inhibins appear to oppose the functions of activins.

Cellular Localization

Secreted
